Job Application for Technical Software Team Leader (J356923AJSB-181116)

Dear Hiring Manager,

Through a leadership position at my previous jobs (Edge Innovation and E.Near, Nearshore Technology Solutions), I had accountability for the design, implementation, and execution of multi-thousands euros turnkey projects. Specifically, I had to supervise the entire technical and technological components of all projects.

During that time, I successfully led more than 5 parallel projects through all development phases from initial conception through completion within targeted cost, schedule, and goals. In addition to managing and supervising teams, I also had to participate in the actual development process as an active developer. In short, I have proven organizational leadership and decision-making skills that can make an immediate contribution to your operations and business development.

Some of the qualities and credentials I have to offer are:

- MSc, and PhD¹ in Computer Science and Engineering.
- 10+ years of professional experience, including 2 in project management and simultaneously in team-leadership, plus 6+ as a full stack developer.
- Expertise in several programming languages, more relevantly, Java (J2EE and J2ME), Objective-C, C, C++, C#, Swift, and Python.
- In-depth knowledge of distributed, parallel, and cloud computational systems, including its communication formats and standards (XML, JSON, SOAP, REST, etc).
- Team-focused leader and motivator.
- Expertise in several multidisciplinary technologies (iOS, Android, Unity, Java Swing).
- Creative and proactive troubleshooter and problem solver.

Please find my résumé attached. An interview would allow me to provide more information about myself and how we could mutually benefit each other. I am available by phone, email, or skype. Thank you very much in advance for your consideration, I look forward to hearing from you soon.

Sincerely,

Orlando Pereira
